## DSC

### Premium Dampening System Cleaner

#### Uses

BöttcherPro DSC is an economical alkaline dampening system cleaner. Used to clean fountain solution recirculating systems, BöttcherPro DSC is ideal for use in MAN Turbo dampening system as well as all other dampening system recirculators.

#### Application

Completely drain dampening system. Wipe residue from reservoir and trays. Remove filters. Fill system with fresh water (use warm water if available).

For normal contamination: add 6 oz of DSC per gallon of water.

For heavy contamination: add 12 oz of DSC per gallon of water.

Turn on recirculator and let solution circulate for a minimum of 1 hour (up to 4 hours if possible). The longer DSC is allowed to circulate the better cleaning job it will do.

Drain tank and refill with plain water. Circulate for 10 to 30 minutes. Open drain and continue to add plain water and drain until water is clear

Replace filters and add fresh fountain solution.

THIS PRODUCT IS NOT SUITABLE FOR USE WHILE PRINTING. DO NOT MIX WITH FOUNTAIN SOLUTION.
