

Febolube WP

Idle Unit Roller Lubricant

Uses

Febolube WP is used to protect rollers in idle printing units. To be used on dry running rollers when not printing all units. Can be used with conventional, hybrid, or UV printing on conventional (NBR) or Chameleon compounds. Not for use on EPDM compounds (dedicated UV).

Application

Apply a thin film of Febolube WP to idle rollers with an ink knife. Use enough to mimic a normal ink film thickness. After use remove with any conventional Böttcher roller wash such as Böttcherin Offset 4050, Böttcherin 60, or Böttcherin Blue.

Characteristics

- Prevents dry running of inking rollers
- Prevents damage due to abrasion while running idle
- Prevent damage caused by overheating while running idle
- Prolongs roller life
- Good compatibility with NBR (conventional) and Chameleon (dual use) roller compounds
- Does not mist
- Does not need replenishment
- Not to be used for UV-only roller compounds (EPDM)
