EP 105

Low Odor Water Miscible Blanket & Roller Wash

EP 105 is an aliphatic, water-miscible solvent wash specially formulated to clean ink and paper residue off of heatset and sheetfed blankets, rollers, floors, walls, and equipment. It is non-flammable and exhibits a low vapor pressure. It rejuvenates blanket and roller performance and exhibits minimum detrimental effects to fountain solutions or plates. EP 105 contains no harmful aromatic hydrocarbons. Low odor makes it an ideal choice for print mills.

Directions For Use

Manual Application: Saturate a cloth and manually apply a coating to the blanket or roller. Allow several seconds for it to penetrate and repeat. Use full strength or dilute 5 parts wash to 3 parts water for cleaning areas with heavy paper build-up. *Automatic Wash Systems:* Add EP 105 to the blanket wash storage tank. Dilution ratios can vary from 1:2 (water to wash), to 8:1 (water to wash), depending on press type, ink manufacturer, paper type or wash system.

Technical Specifications

Drying Speed:	Moderate
Water Miscible:	Yes
Flash Point (°F TCC):	105°F
VOC (Method 24):	6.34 lb/gal
Vapor Pressure (mm HG):	2.79
Photochemically Reactive:	No
Weight/Gallon:	6.5 lbs.
Specific Gravity:	0.78
HMS:	1 - 2 - 0 - B

Features

- Water-miscible
- Low odor - ideal choice for print mills
- No harmful aromatic hydrocarbons
- Effective on paper residue
