WinWash 120 WM

Premium Water Miscible Blanket & Roller Wash

WinWash 120 WM is a premium water miscible blanket and roller wash fortified with natural citrus oils for deep cleaning and rejuvenating of blankets and rollers. Rejuvenates rubber by removing oxidation. Offers excellent emulsion stability when mixed with water. Suited for removing paper dust, ink, and gum residues.

Directions For Use

Manual Application: Saturate a cloth and manually apply a coating to the blanket or roller. Allow several seconds for it to penetrate and repeat. Use full strength or dilute 5 parts wash to 3 parts water for cleaning areas with heavy paper build-up. *Automatic Wash Systems:* Add WinWash 120 WM to the blanket wash storage tank. Dilution ratios can vary from 1:2 (water to wash), to 8:1 (water to wash), depending on press type, ink manufacturer, paper type or wash system. *Rubber and Composition Rollers:* Apply wash to top of roller and allow time to penetrate ink. Set the wash-up tray blade and apply additional solvent to edge of blade until it appears clean.

Technical Specifications

Drying Speed:	Fast
Water Miscible:	Yes
Flash Point (°F TCC):	105°F
VOC (Method 24):	6.57 lb/gal
Vapor Pressure (mm HG):	2.4 (composite, calculated)
Photochemically Reactive:	Yes
Weight/Gallon:	6.83 lbs.
Specific Gravity:	0.82
HMIS:	2 - 2 - 0 - X

Features

- Deep cleans blankets and rollers
- Water-miscible
