WinWash O-253

Premium Water Miscible Blanket & Roller Wash

WinWash O-253 is a premium water miscible blanket and roller wash. This product deep cleans blankets and rollers so effectively that it will eliminate the frequent need for roller and blanket de-glazers. It contains a balanced blend of ingredients to remove both water soluble and solvent soluble glaze in one wash-up step. Rejuvenates rubber by removing oxidation and glaze. A clear yellow solvent with a mild solvent citrus odor. Flash point 104°F.

Directions For Use

Blanket Wash: Saturate a cloth and apply to blanket. Apply an initial coat to the blanket and give it a few seconds to penetrate. Repeat application with a saturated cloth. Wipe clean with a dry rag. For added performance to remove water soluble glaze and paper dust, apply WinWash O-253 to a water soaked rag and then apply to the blanket. Repeat as needed. *Rubber and Composition Rollers:* Apply to top rollers and give it time to dissolve ink. Set the blade and apply additional solvent until blade is clear.

Technical Specifications

Drying Speed:	Medium
Water Miscible:	Yes
Flash Point (°F TCC):	104°F
VOC (Method 24):	6.76 lb/gal
Vapor Pressure (mm HG):	2.6 (composite, calculated)
Photochemically Reactive:	Yes (Cal Rule 102)
Odor/Fragrance:	Mild petroleum with citrus note
Weight/Gallon:	6.83 lbs.
Specific Gravity:	0.82

Features

- Deep cleans blankets and rollers
- Water-miscible
- Exceptional general use pressroom wash
- Non-damaging, will not harm rollers or blankets
