

BöttcherPro Platefix-S

Plate Cleaner/Chrome Roller Cleaner

Uses

BöttcherPro Platefix-S is an emulsion style cleaner and activator for aluminum offset plates. It is also an excellent chrome roller cleaner.

Characteristics

- for positive and negative aluminum plates
- contains mild abrasives
- for cleaning and activating non-image areas
- for removal of dried ink from non-image and image areas
- high viscosity, easy to apply
- contains mild solvents and abrasives
- excellent chrome roller cleaner and desensitizer

Application

Apply to plate with clean plate wipe or sponge. Wipe gently to remove ink and to desensitize non-image area of plate.

Use full strength on sponge to clean and desensitize chrome rollers.

Note

Apply BöttcherPro Platefix-S undiluted with sponge or plate wipe. Rinse with clean water. Wear gloves for skin protection.

Caution: Take care that product does not contaminate dampening system.

May not be suitable for all CTP plates. Also available in an abrasive free formula, for use on CTP plates and other plates with less durable image.
