

# BöttcherTop 4400

Sheetfed Blanket for Conventional, UV and Hybrid

**Böttcher-engineered blanket product benefits:**

- ❑ Proprietary surface rubber is based on the same compound technology as the GATF Intertech Award winning Chameleon inker roller.
- ❑ Resistant to swelling from polar solvents found in UV and hybrid inks and washes while still compatible with all conventional inks and washes.
- ❑ Superior compressibility makes the BöttcherTop 4400 Chameleon a very durable blanket.
- ❑ Micro-ground and polished surface results in sharp well defined dots and dense clean solids.
- ❑ Stable carcass reduces gauge loss and reduces need to over-pack or repack.
- ❑ Hard surface is resistant to abrasion. High edge cut resistance.
- ❑ Quick release reduces piling.

**Technical Specifications:**

<b>Application</b>	
Presses	Sheetfed
Substrates	Paper and carton
Inks	UV/EB, Hybrid, Conventional
Wash-up solvents	UV/EB, Hybrid, Conventional
<b>Surface Properties</b>	
Color	Blue
Finish	Micro-ground and polished
Roughness (Ra)	0.9-1.2µm
Surface hardness	63° Shore A
<b>Mechanical Properties</b>	
Thickness	4-Ply .077" +/- .001
Overall hardness	80° Shore A
Compressible layer	Closed cell
Gauge loss at 'run in'	<2%
