

# BöttcherPro Antiskin

## Ink Antiskin Agent

### Uses

BöttcherPro Antiskin inhibits the drying of ink in used ink tins and on inking units during machine stops, preventing skin formation.

### Characteristics

- Prevents premature oxidation drying of ink
- Flash point > 62 °C
- Slow evaporation
- Long term effective
- Attacks neither rollers nor plates
- No aromatics or CFC's
- Available in a 400 ml spray can or for use in a pump sprayer (1 litre bottle)

### Application

BöttcherPro Antiskin is applied via pump spray bottle or from a spray can. It is applied on the surface of ink. Only a short spray application is needed, but ensures an even coverage of the inking system.

If using the spray can, it is under pressure and must be protected from direct sunlight and from temperatures above 50 °C during storage. Do not store at temperatures below -5 °C.
