

Böttcher BPC

Emulsion Plate Cleaner, Finisher & Gum Preservative

Uses

Emulsion plate cleaner, finisher and gum preservative. Removes ink, gum and paper build-up in the image and non-image areas. Fortified with cleaning and desensitizing agents for the non-image area. The gum preservative will plate down after it cleans to give a long running protected plate. The restored plate gives fast roll-up on press start-ups.

Application

Directions For Use: SHAKE BEFORE USE!
On Press: Utilizing a soft cotton cloth or dampened sponge, apply product to the entire surface area of the plate. To cover the entire plate, use inch forward feature on the press and apply product in a broad sweeping motion across the entire surface. Wipe off with a clean rag. *For Storage:* Utilizing a soft cotton cloth or dampened sponge, apply product to the entire surface area of the plate. Buff dry, being sure that all ink has been completely removed from the plate.

Characteristics

- Restored plate will give fast roll-up on press start-ups
- Removes ink, gum and paper build-up

Technical Specifications

- VOC 2.18 lb/gal
- HMIS 2 - 1 - 0 - X

Packaging

- 1 quart (6 per case)
