

Böttcherin 60-F

Premium Filtration-Recyclable Water Miscible Roller and Blanket Wash

Uses

Roller and blanket wash for sheetfed, web and newspaper presses. Suitable for manual application or for use in automatic roller and blanket cleaning units.

Characteristics

- specifically designed for use with filtration recycling units
- based on aliphatic hydrocarbons
- aromatic free
- flash point >140°F (60° C)
- water miscible
- good wetting of blanket and roller surfaces
- contains corrosion inhibitor
- leaves no residue when rinsed with water
- slow evaporation

Recycling

Böttcherin 60-F is designed for recycling after having passed through a filtration unit. For this reason, it is engineered to ensure that the emulsion of water and Böttcherin 60-F will totally separate quickly.

Do not contaminate with white spirit or other washes or press room chemicals, if using in filtration systems. Use prefiltering of return waste if excessive paper dust is present. For effective filtration, ensure minimum environment temperature is above 20° C.

Regularly clean the circulation systems to reduce algae build-up. Use BöttcherPro Calcit or Aquaset as a rehardener for RO and soft water.

Application

Follow the automatic washing system manufacturer's operating instructions. Match automatic system settings to match the properties of Böttcherin 60-F.

If manual cleaning with a hand rag, wear protective gloves during application. Follow all press safety procedures. Böttcherin 60-F is used undiluted when manual cleaning. Rinse with water.

Approvals

Böttcherin 60-F is approved by MAN-Roland, Heidelberg, KBA, Oxy-Dri, Technotrans and Betz for use in their machines. FOGRA certified.
