

Böttcherin Hybrid

Cleaning Agent for Rollers and Blankets

Uses

Roller and blanket wash for web and sheeted presses. It is suitable for both manual cleaning and use in automatic washing systems, if printing with hybrid (a mix of UV and conventional ink) or conventional inks.

Characteristics

- ☐ Single product, saves storage space
- ☐ Flash point approx. 130 °C
- ☐ Water miscible
- ☐ Free of aromatics
- ☐ Corrosion inhibited
- ☐ Low VOC 50 gm/l (Method 24)
- ☐ Meets SCAQMD Rule 1171 requirements for January 1, 2008
- ☐ Good dissolving power with hybrid and conventional inks
- ☐ Slow evaporation
- ☐ No residue when removed with water
- ☐ Good chemical compatibility with printing rollers and blankets for conventional printing inks and dual purpose printing
- ☐ Not suitable for use in EPDM rollers

Application

Follow the automatic washing systems manufacturers' operating instructions. If manual cleaning with a hand rag, wear protective gloves during application. Follow all press safety procedures. Böttcherin Hybrid is used undiluted when manual cleaning. Rinse with water.

We recommend to match the parameters of the automatic washing unit to Böttcherin Hybrid. If manual cleaning, rinse with water until all dried-on and fountain residues have been removed

Marking

Böttcherin Hybrid is classified and marked according to EC-Directive 88/379/EEC - in its latest version. It is not classified as a dangerous good in the sense of national and international transport regulations (GGVSE - ADR/RID - GGV See/IMDG).
