

Böttcherin UV-Elettra

Roller and Blanket Wash for UV Inks

Uses

Böttcherin UV-Elettra is suitable for both manual cleaning and for use in automatic washing systems (cleaning web systems) to remove UV inks. It is specifically designed for use in automatic washing systems of Elettra.

Application

Böttcher recommends setting the washing system to optimize the cleaning cycle and Böttcherin UV-Elettra performance. In the case of manual cleaning, use Böttcherin UV-Elettra undiluted. Apply the wash to the blanket or roller, then rise with water until all ink and cleaning agent residues have been removed.

Follow the automatic washing system manufacturer's operating instructions. If manual cleaning with a hand rag, wear protective gloves and approved personal eye protection during application, and follow all press safety instructions.

Böttcherin UV-Elettra is approved by the manufacturers manroland and Koenig & Bauer for use in their machines and by Elettra for use in their automatic washing systems.

Characteristics

- Flash point > 62° C
- Completely water miscible, free of aromatics, corrosion inhibited
- High wash quality
- Slow evaporation
- Economical in use
- Designed for use in automatic washing systems (cleaning web systems)
- Good chemical compatibility with UV resistant printing rollers and blankets
- Not suitable for conventional roller qualities
- Attacks non-baked positive plates
