

# BöttcherFount N-1002

## Mild Acid Fountain Solution Concentrate

### Uses

BöttcherFount N-1002 is a mild acid fountain solution concentrate formulated for use on newspaper presses. For all types of presses and dampening units.

### Application

Standard dosage is 2% by volume (approx. 2.5 oz. per gallon) giving a pH value of 4.80 - 5.30 and a conductivity of around 1000 uS/cm. Concentration may be varied depending on water hardness from 1.5% (soft water) to 3% (hard water). Exceeding 3% (3.8 oz. per gallon) is not recommended. Before installing BöttcherFount N-1002, empty and clean the fount circulation system with clean water. Check the metering device. For precise control of the dosage it is recommended to control by conductivity. For best results, generate a concentration vs. conductivity control chart using actual press supplied water and BöttcherFount N-1002.

### Packaging

55 Gal / 804067 • 275 Gal / 804068

### Characteristics

- Low dosage
- Clean saturated colors
- For use on newspaper presses
- For all types of presses and dampening units

### Technical Specifications

Suggested Dosage:	2.5 oz. / gallon
VOC	0.00 lbs. / gallon
DOT:	Non-Regulated
HMIS:	1-0-0-B
