OASIS 17+

HEATSET FOUNTAIN SOLUTION CONCENTRATE

Optima Oasis 17 + is an all-in-one, premium one-step fountain solution concentrate designed for commercial web offset/heatset operations. Oasis 17+ includes all of the perks of the original Oasis 17 product but will keep plates wetter and reduce surface tension. This is an excellent fountain choice for alkaline papers. It is a proven performer for metal decorating applications and applications using PMS inks and works great for webs running metallic and conventional inks on the same press.

Directions For Use

The recommended operating concentration is 4 ½ oz per gallon. Adjust concentration as necessary. The normal adjustment range is from 4 to 6 oz per gallon.
