

BöttcherPro

Platefix

Plate Cleaner

Uses

BöttcherPro Platefix is a non-abrasive cleaning emulsion for aluminum offset printing plates.

Characteristics

- for positive and negative aluminum plates
- for cleaning and activating non-image areas
- for removal of dried printing ink from image and non-image areas
- high viscosity, easy to sponge onto plate surface
- contains mild solvents

Note

Apply BöttcherPro Platefix undiluted with a sponge. Rinse with clean water. Wear gloves for skin protection.

Caution: Take care that the product does not enter the dampening system.

Suitable for use on most CTP plates. Test on a used printing plate for compatibility with image.
