

BöttcherTop Impressa

Compressible Sheetfed Blanket

Böttcher-engineered blanket product benefits:

- Performs well on both coated and uncoated stock.
- High compressibility makes the BöttcherTop Impressa a very smash resistant blanket.
- Micro-ground and buffed surface results in sharp well defined dots and dense clean solids.
- Stable carcass reduces gauge loss and reduces need to over-pack or repack.
- Hard surface is resistant to abrasion. High edge cut resistance.
- Quick release reduces piling.
- Excellent choice for stochastic, FM, or XM screened separations.

Micro-ground chemical and heat resistant quick release face rubber reduces piling.

High concentration of closed cells, evenly distributed in compressible layer, assures excellent smash and edge cut resistance. Handles uneven substrates with ease.

Stable carcass manufactured from pre-stretched super calendered fabric assures minimal gauge loss. No doubling or slurring.

Technical Specifications:

Application	Presses	Sheetfed
	Substrates	Paper and carton
	Inks	Conventional
	Wash-up solvents	Conventional
Surface Properties		
	Color	Blue
	Finish	Ground and polished
	Roughness (Ra)	0.6-1.0µm
	Surface hardness	69° Shore A
Mechanical Properties		
	Thickness	0.077" +/- .001
	Overall hardness	78° Shore A
	Compressible layer	Closed cell
	Gauge loss at 'run in'	<.001"
